

AMEXIO continues its international development & opens a new entity in Switzerland (Geneva)

Paris, Thursday 29-Nov-2018

AMEXIO, European leader in the field of ECM & CCM, continues its international development by opening a new entity in Switzerland.

Created in 2006, Amexio has grown exponentially since its creation, to become the major player on the market for the integration of ECM & CCM solutions in France and then in Europe. At the end of 2018, the AMEXIO Group is accelerating its European dynamism by announcing this new location in Switzerland.

The European adventure began with an external growth operation in March 2017, with the acquisition of "Gam Consult", now "Amexio Be-Lux", a company based in Belgium (Brussels) and Luxembourg (Windhof). That same year, Amexio opened an entity in Portugal (Porto).

From next January on the Swiss entity will be composed of a manager and two key employees of the group (Thomas Schneider & Etienne Jouvin) who will give a new geographical orientation to their career. In parallel, three senior consultants will join them during the first quarter of 2019 to enlarge the team.

A manager (already active in this area) will be in charge of the development of this entity while using the group's assets & Back Office.

The target is to build up the entity up to 25-30 people by 2021.

Xavier Morcillo, President of Amexio *"I am very pleased to announce the creation of this new entity, which enables us to be present in 5 countries.*

The opening of Amexio Switzerland is fully in line with our development strategy and will enable us to answer a growing demand in this geographical area.

Furthermore, we offer a wider internal mobility for our AmeXiens. This will contribute to the professional fulfilment of our employees."

As a reminder, Amexio is the Leading Integrator of ECM-CCM in Europe:

- 230 people
- 24 M€ of turnover in 2018
